

Internet leased line

Dedicated, Reliable
&
Assured Service

Why Pulse?

Pulse internet leased line meets the growing internet service demands of diverse sectors through our strong global submarine fibre network.

We are strongly connected through the global submarine fibre network via Mumbai and Chennai landing stations and are available on both Trans-Pacific & Trans-Atlantic routes, thereby addressing redundancy at every level.

Internet Leased Line Architecture with dual last mile connectivity

Pulse connects its clients through a dual last mile which is a combination of our own ring fibre and wireless (RF) redundancy from the various POPs built and maintained by us on a mesh architecture to ensure high uptime.

Highly Redundant network with a combination of fiber and RF

Our Internet partners

Our peering partners

Quick Implementation

Our deliveries happen with 7 working days, which is fastest in the industry

Route Optimization

We optimize the routing to provide the best latency anywhere across the globe

Service Guarantee

We guarantee uptime of 99%

Hosting / Static IPs

We provide you static IPs as an IPv4 , IPv6 or dual stack based on your requirement, for hosting your own servers in-house

Pulse ILL benefits

Pulse offers various features like none other ISP'S.

Pulse ILL

focuses a major role in giving services and support

Symmetric Bandwidth

Download and upload bandwidth (speed) are the same, even when used simultaneously

Wireless Auto-Failover

Incase of a failure in our primary fibre there is an auto-failover through our wireless RF last mile to ensure maximum uptime through an alternate medium

Advertise IPs

Our network is compatible to advertise your IP pool via BGP

Bandwidth on Demand

Scalability of bandwidth is probable with minimal processing time. This can be permanent, scheduled or even temporary

Limitless Data Transmission

There are no limitations in download or upload of data for the bandwidth you subscribe

Customer Care

Our in house proactive monitoring team alerts before the customers are aware of the link alarms.

Pricing

Pulse pricing depends on understanding the requirement and feasibility study of the client site.
